FOR IMMEDIATE RELEASE

BEACH ADVISORY

The Department of Planning and Natural Resources (DPNR) announces that the Beach Water Quality Monitoring Program, which evaluates weekly water quality at popular swimming beaches throughout the Territory by sampling for Enterococci Bacteria and Turbidity, which is a measure of water clarity, advises the public of the following:

DPNR performed water quality analysis at 33 designated beaches throughout the Territory during the week of January 25-29, 2016. The following beaches **meet water quality standards and are safe for swimming or fishing**:

St. Croix

Stoney Ground
Protestant Cay
Buccaneer
Cramer Park
New Fort (Ft. Louise
Augusta)
Dorsch

Frederiksted Public Beach
Pelican Cove (Comorant)
Shoy's
Rainbow
Cane Bay
Chenay Bay

Princess (Condo Row) A –
Mill Harbour
Halfpenny
Princess (Condo Row) B -
Breezez
Grapetree Bay

St. Thomas

Lindquist
Coki point
Vessup Bay
Brewer's Bay
Bluebeards
Secret Harbor
Bolongo Bay

Sapphire
Water Bay
Frenchman's Bay
Hull Bay
Lindbergh Bay
Magen's Bay

St. John

Oppenhiemer

Johnson Bay

Frank Bay

Great Cruz Bay

The following beaches **do not meet water quality standards because they exceed the established Enterococci Bacteria threshold and therefore are not considered to be safe for swimming or fishing:**

St. John

Cruz Bay

High levels of Enterococci Bacteria and Turbidity may be caused by runoff due to heavy rains, heavy marine vessel traffic, high wave activity near the shoreline, irresponsible recreational use, etc. Runoff can consist of sediment, pesticides, animal feces and oil & grease, all of which are harmful to the waters of the Territory.

DPNR will continue to monitor these popular swimming areas. DPNR also recommends that you use your own discretion when swimming or fishing at the designated beaches. If the waters appear muddy or murky or have foul odors, do not swim or fish. For additional information regarding water quality call the Division of Environmental Protection at 773-1082 in St. Croix.
